DETAILED ACTION***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- 5 I. Claims 1-15, drawn to an apparatus for applying a thermal conductive medium to an inside portion of a sheath and a system for applying a thermal conductive medium to a portion of the interior of a sheath, classified in class 239, subclass 67.
- II. Claims 16-22, drawn to a method of applying a thermal conductive medium to an
- 10 interior portion of a sheath, classified in class 427, subclass 230.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

15 another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to make another and materially different process: a process in which a coating other than a thermal conductive medium is applied, such as a non-stick, adhesive, or protective coating; a process in which the thermal conductive medium is applied in the shape of a line without rotating the nozzle or, similarly, a process in which the sheath and not the nozzle is

20 rotated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael P. Straub (Reg. No. 36,941) on 06 March 2003 to
5 request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

15 Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Fletcher III whose telephone number is (703) 308-7956. The examiner can normally be reached on Monday through Friday, 9 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P. Beck can be reached on (703) 308-2333. The fax phone numbers for the
20 organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
